MOBILIZING SCIENCE TO ACCELERATE SOCIAL INNOVATION

James Radner, MPhil

Assistant Professor, University of Toronto

Senior Fellow, Center on the Developing Child at Harvard University

Stretch outcomes: measurable results representing high but potentially achievable aspirations for the well-being of a defined population.

Program → Population

Outputs → Outcomes

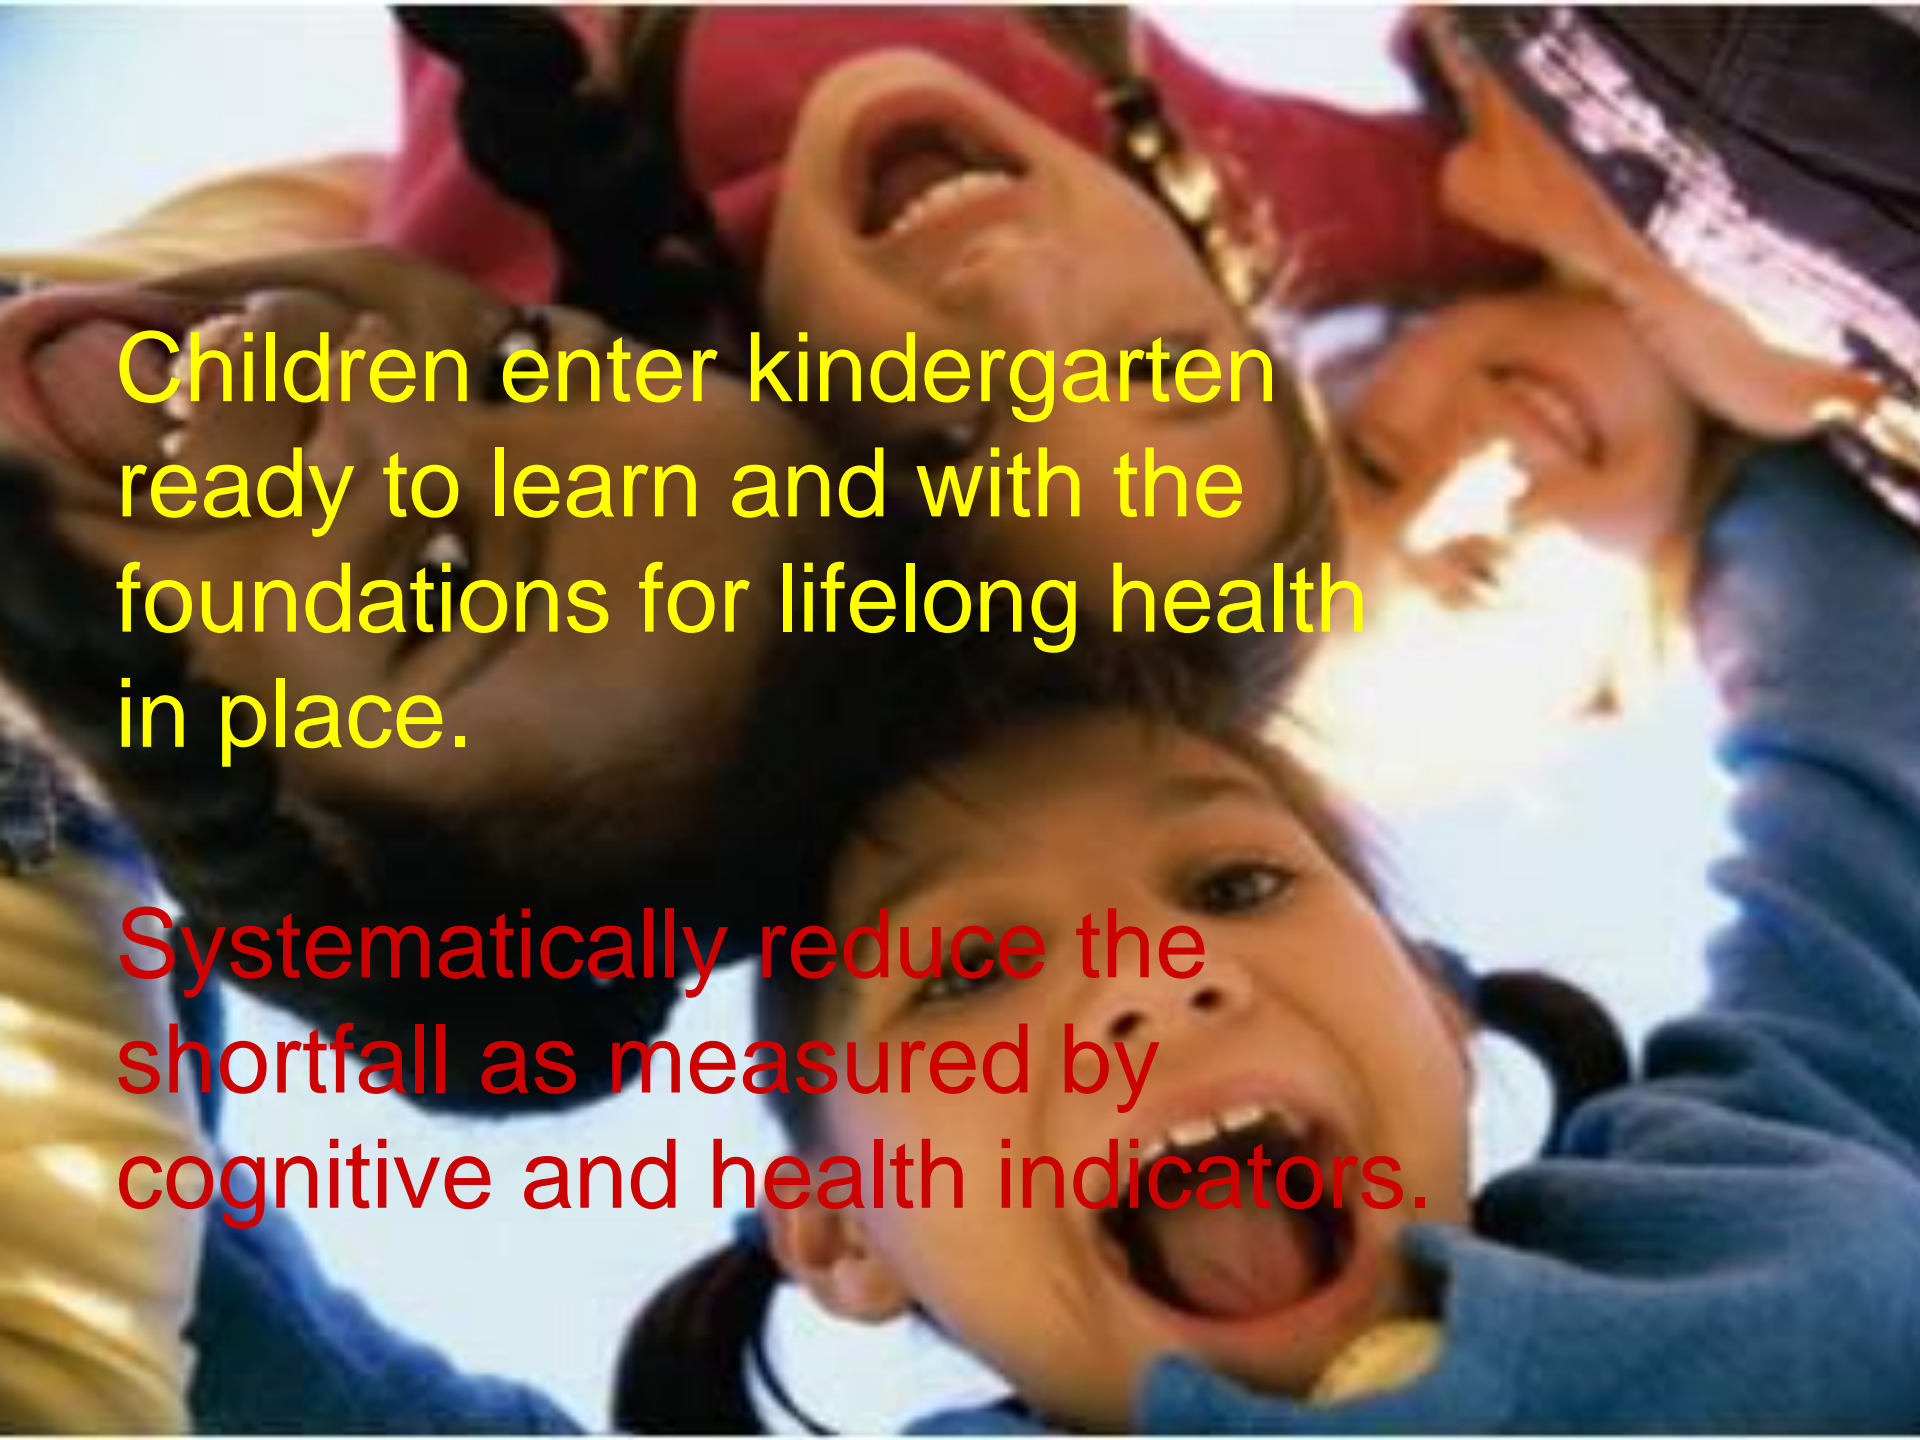

Met needs → Unmet needs

Photo: Travis Nep Flickr Creative Commons

Survival Rates for Acute Lymphocytic Leukemia Under Age 15 Have Increased Exponentially Over 4 Decades

A close-up, high-angle shot of a group of diverse children, including a young girl with braids and a young boy with pigtails, all smiling and laughing joyfully. The children are wearing colorful clothing, and the background is bright and out of focus.

Children enter kindergarten ready to learn and with the foundations for lifelong health in place.

Systematically reduce the shortfall as measured by cognitive and health indicators.

Stretch Outcomes

Today's
Outcomes

Theory of Change: Testable pathways to specific stretch outcomes.

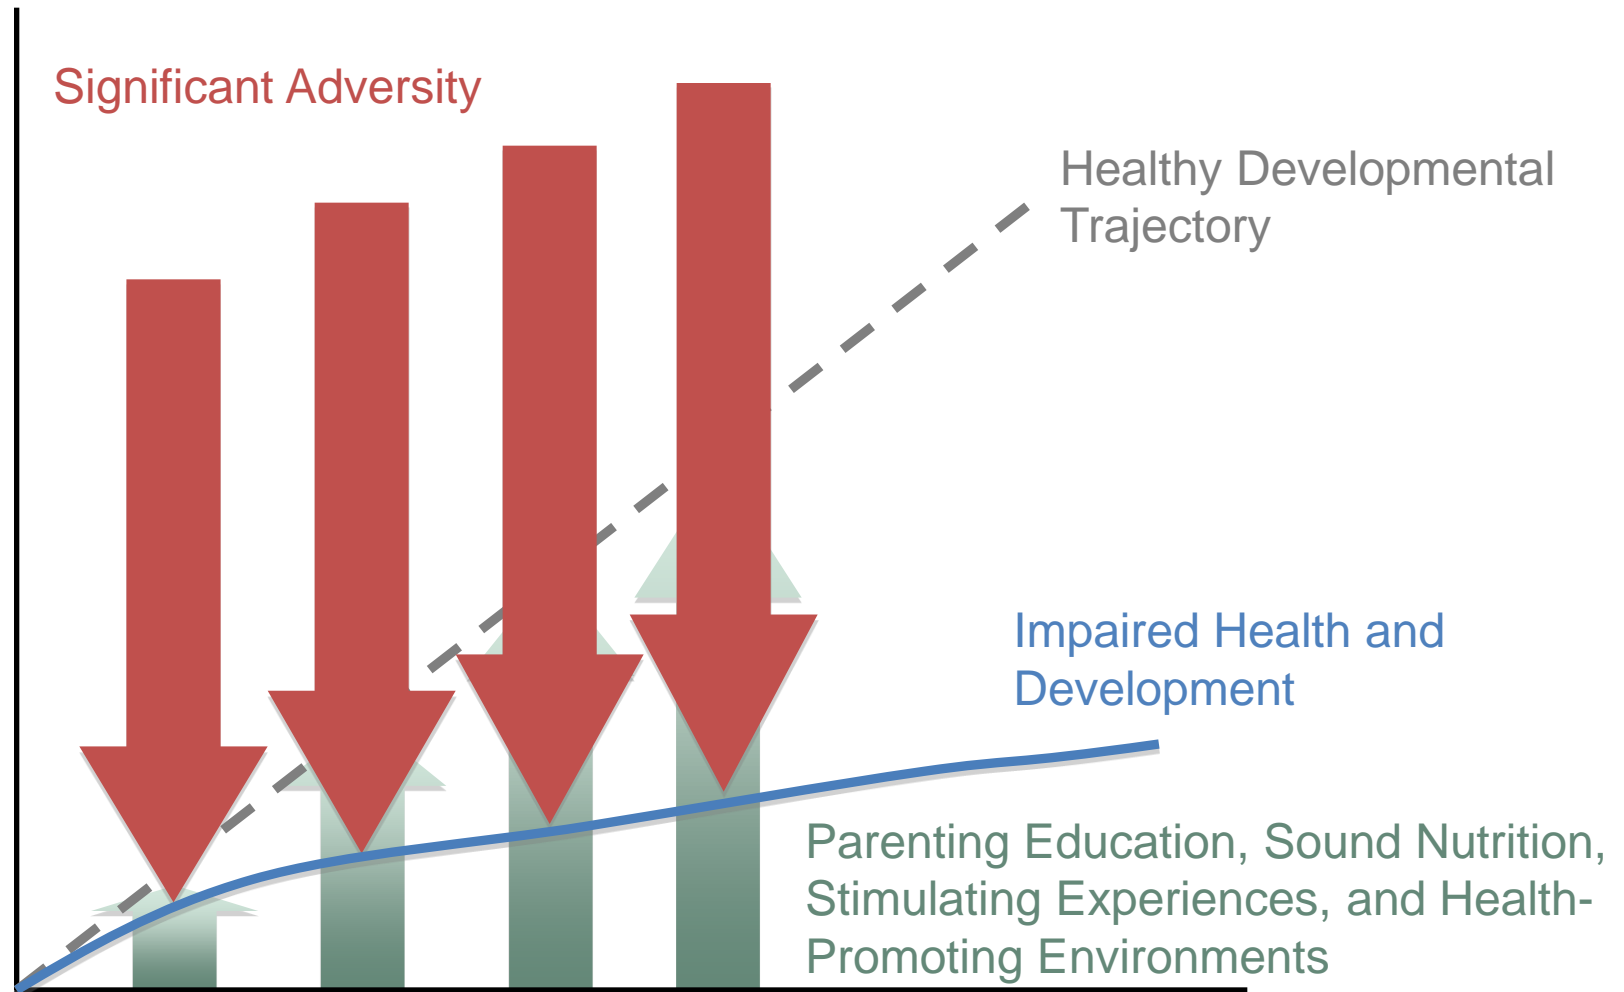

Explicit assumptions
Knowledge base broad: science, practice
Hypotheses narrow: testable
Evolves based on fast feedback

Social Capital

- Shared language and knowledge base
- Cross-boundary relationships and trust
- Institutional commitment
- Simultaneous, multilevel engagement
- Shared understanding of science-based “core story”

Ideas → Big Impact?

Communities of Practice

“Groups of people who share a concern, a set of problems, or a passion about a topic, and who deepen their knowledge and expertise in this area by interacting on an ongoing basis”

(Source: Wenger E., McDermott, J. & Snyder, W.M., *Cultivating Communities of Practice*, Boston: Harvard Business School Press, 2002)

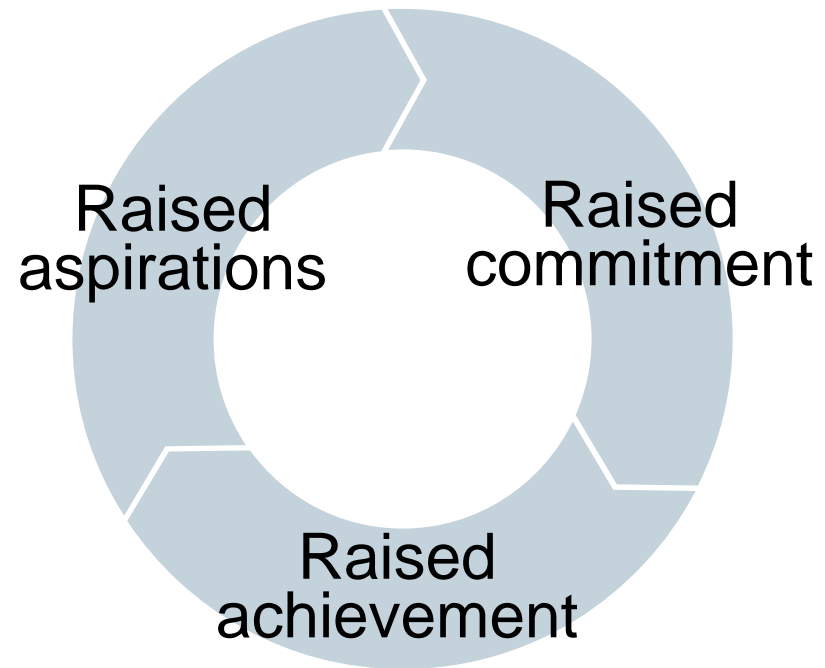

Discovery

Dissemination

 Metric?

Communities of Purpose

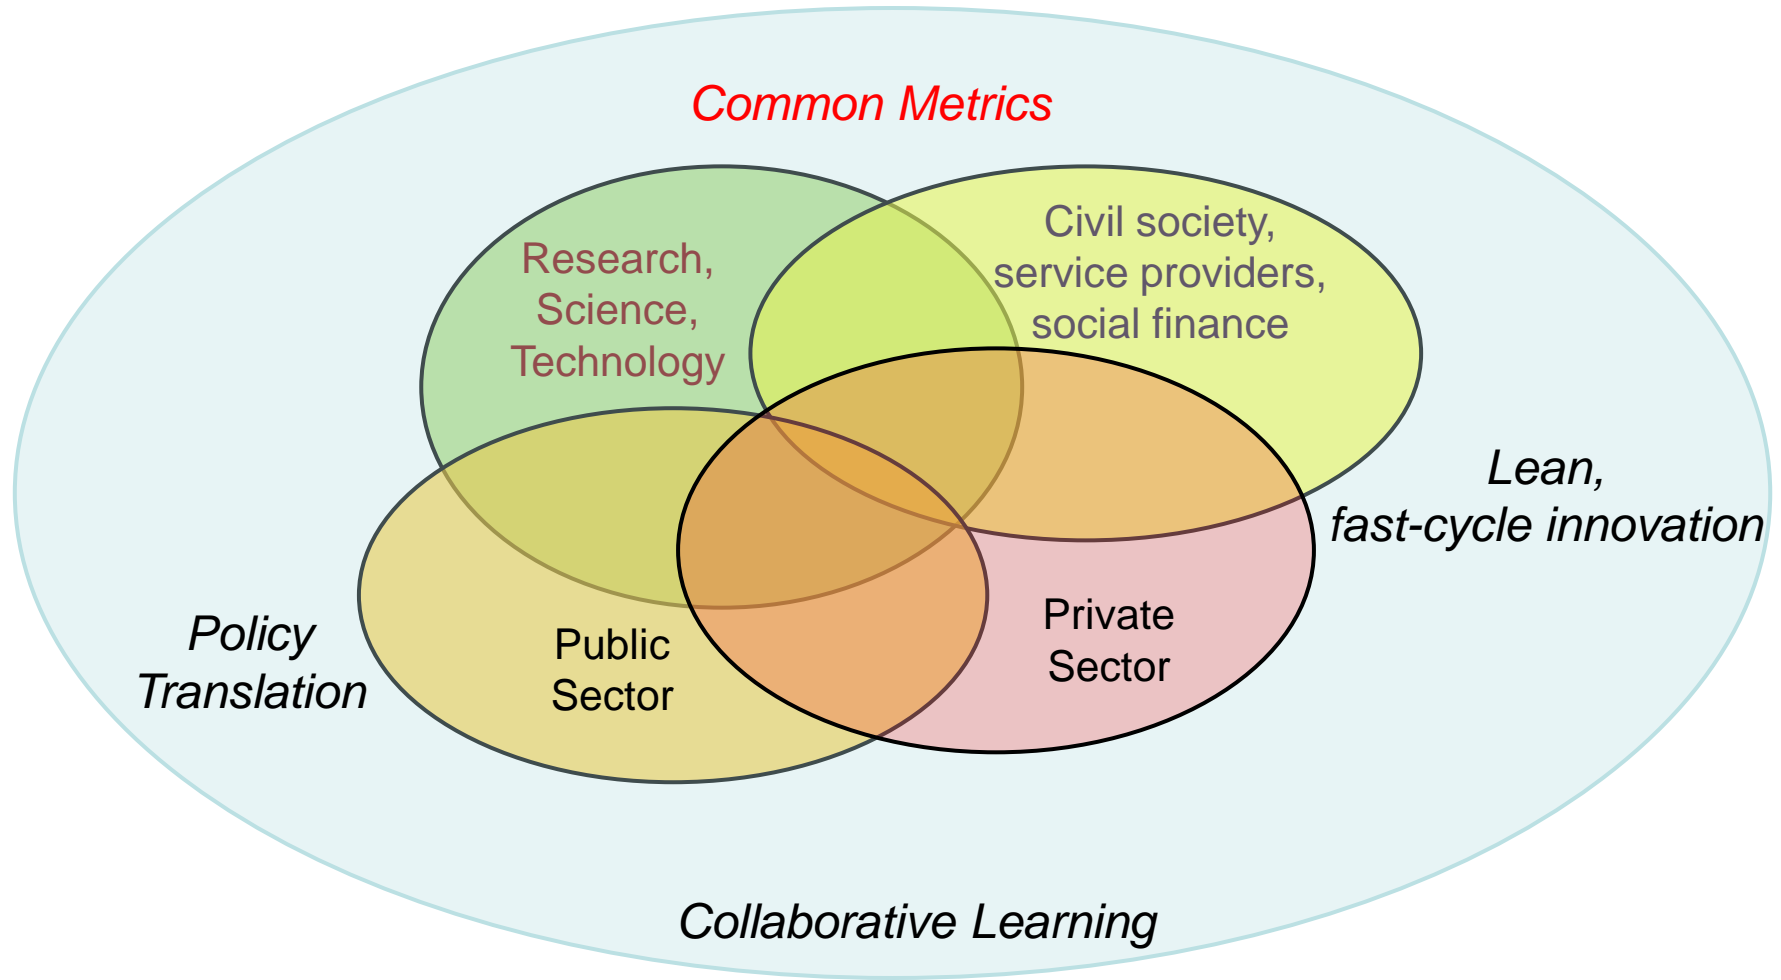

- Community out of diversity
- Meaningful shared purpose and inspiring goals
- Mutual commitment to perform and to learn
- 'Bifocal' drive for both short- and long-term results
- Shared language and distinctive levels of trust

ecosystems: lessons
from business

North American
Example: “Frontiers
of Innovation” (FOI)

Innovation Ecosystems

Customers/customer segments (*Populations*)

- For what customers or segments is my product valuable – i.e., achieves outcomes superior to competitive offerings?
- How to improve the product to make it more valuable to those customers or segments?
- How to make the product valuable to other customers or segments?
- What new products to develop that would be valuable to current or new customers or segments?

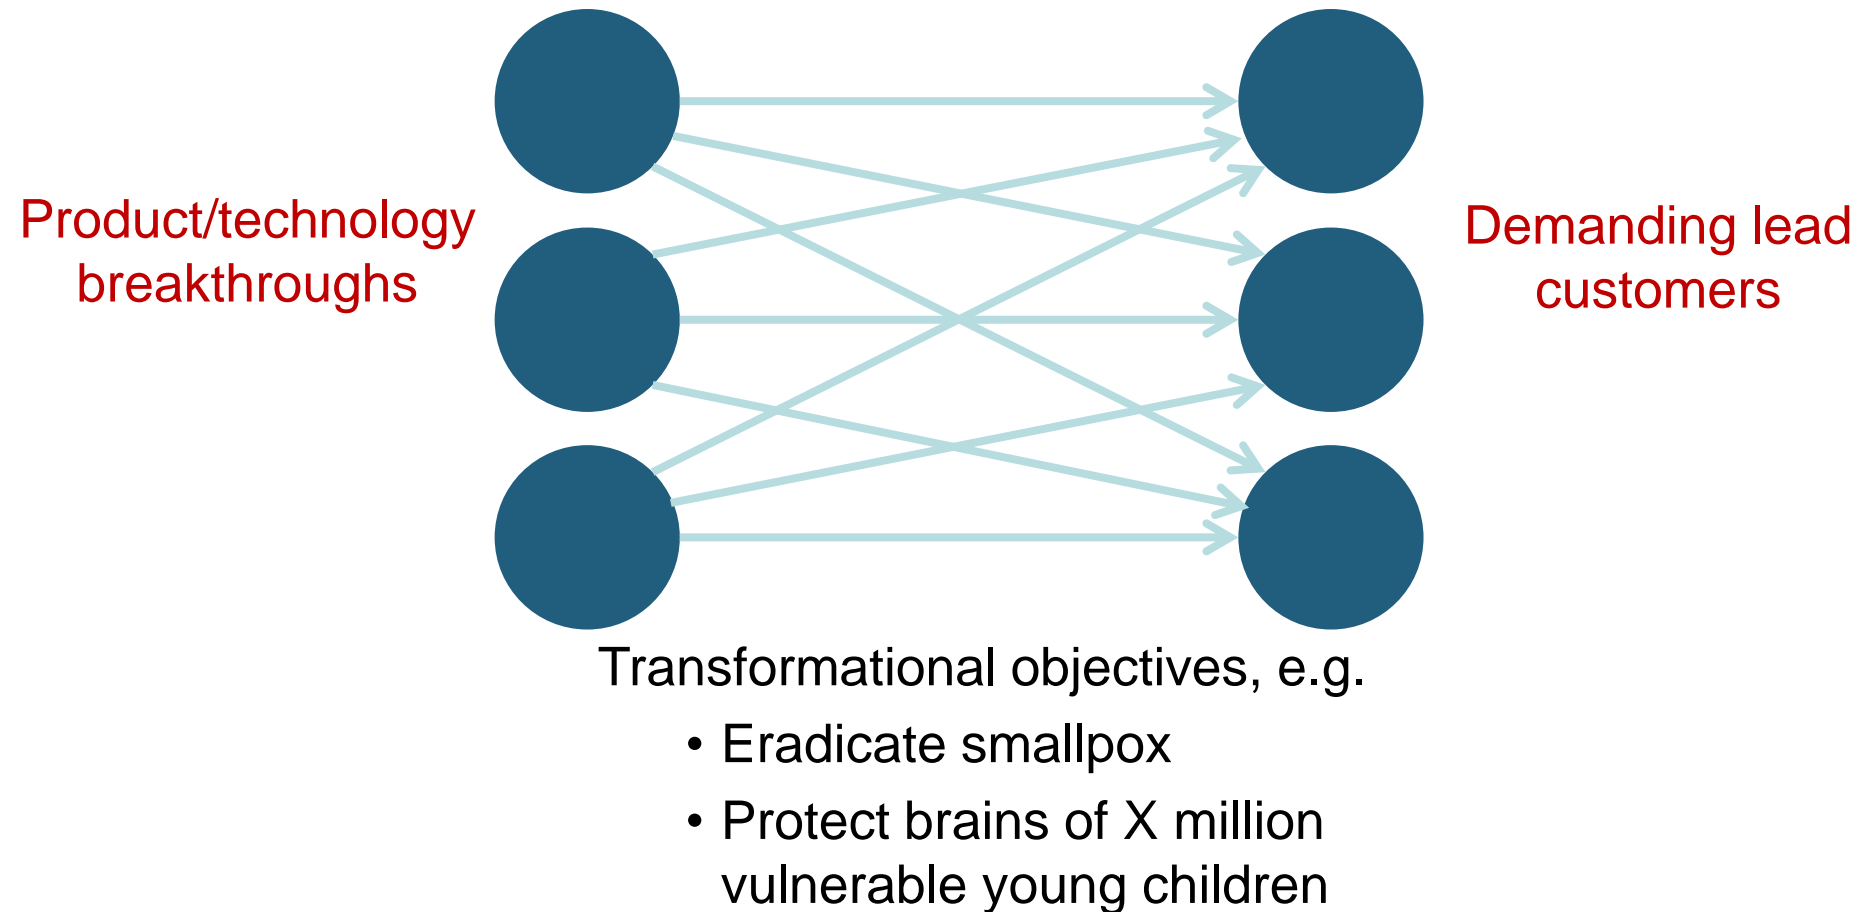

Innovation Ecosystems

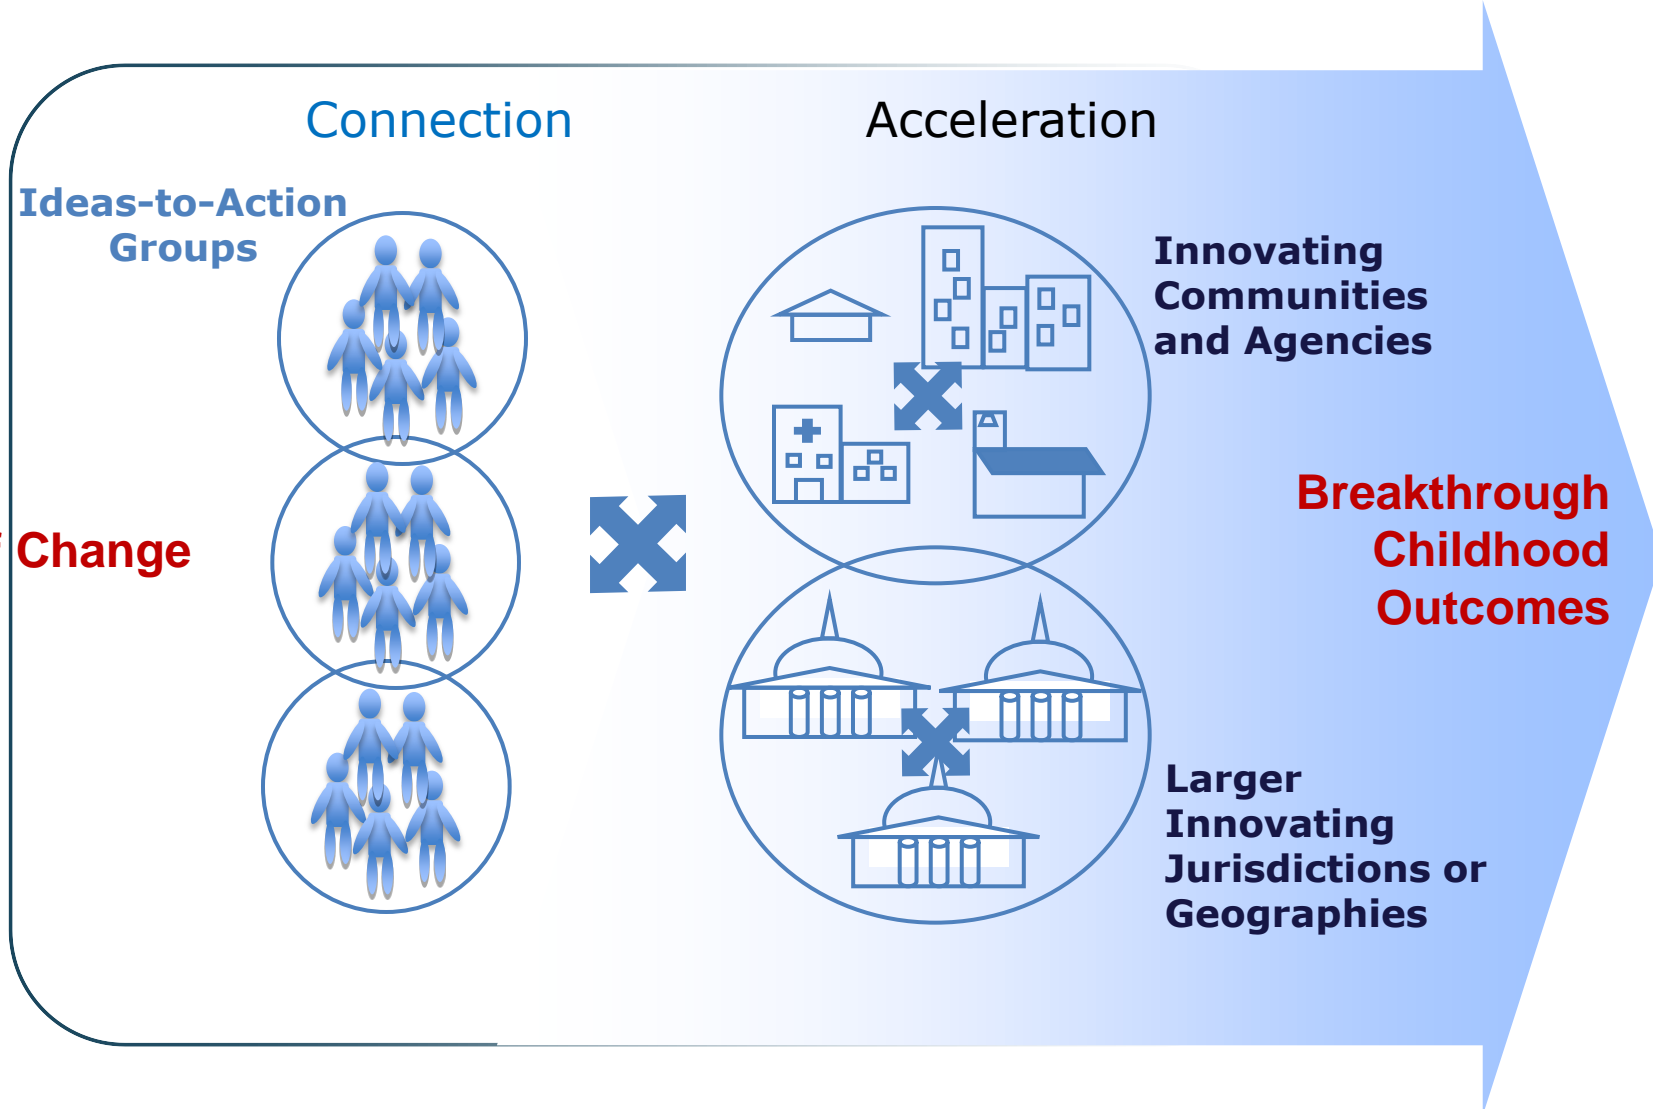

Product Innovators
(Bold Ideas)

- What outcomes am I trying to achieve?
- What are most important challenges to address to improve outcomes?
- To meet these challenges ...
 - How to upgrade existing solution elements?
 - What new elements to incorporate?
 - How to integrate elements more effectively?

Drive for Ambitious Outcomes Energizes and Focuses Innovation

FOI Architecture 2012

Levels of Engagement in FOI

Success Factors for Big Impact

- Ambitious goals for improved outcomes
- Shared metrics, population view
- Explicit impact strategy and innovation agenda: theory of change
- Transparency in sharing progress
- Disciplined approach to learning from failure
- Shared aspiration for mutual success and collective impact
- Relentless focus on unmet needs
